INDEPENDENT AUDITOR'S REPORT

To the Board of Directors and Stockholders F. J. Morrissey & Co., Inc. Philadelphia, PA 19103

We have audited the accompanying statement of financial condition of F. J. Morrissey & Co., Inc. as of December 31, 2002, and the related statements of income, changes in stockholders' equity, changes in liabilities subordinated to claims of general creditors and cash flows for the year then ended that you are filing pursuant to rule 17a-5 under the Securities Exchange Act of 1934. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Generally accepted accounting principles require that fixed assets be depreciated over their estimated useful lives. The Company has computed depreciation on several fixed assets in accordance with the Modified Accelerated Cost Recovery System required for federal income tax purposes, which does not allocate depreciation to expense over the estimated useful lives of the assets. The effects of this departure from generally accepted accounting principles on financial position, results of operations, and cash flows have not been determined.

In our opinion, except for the effects of computing depreciation as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of F. J. Morrissey & Co., Inc. as of December 31, 2002 and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information contained in the Computation of Net Capital is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by rule 17a-5 under the Securities Exchange Commission Act of 1934. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.
